WORK EXPERIENCE

Big Data
(July 2019 - Today)

Junior Data Scientist II

- Operational management of Data Science team and contact with the client to adjust the project steps
- Machine learning models development for demand prediction and selling potential for regions
- Active participation on productization projects for Machine learning models
- Machine Learning model developed for e-mail opening prediction
- Code refactor of Machine Learning models to predict investment allocation
- Exploratory analysis on consuming behavior based on transactions history
- Data processing and database structuring for feeding Machine Learning models
- **Used technologies**: Python (Numpy, Pandas, Matplotlib, Plotly, Sklearn, Scrapy, Selenium and several others), PostgreSQL, Git, and AWS.

Stone Payments
(December 2018 - Febuary 2019)

Summer Intern

- Developed a routing system to improve the sales team productivity.
- Helped to develop a software of intelligence to the sales team.
- Profits estimation of over R$ 10 MM in 2019 results. Second best summer project of 2019.
- **Used technologies**: Python (Numpy, Pandas), Heroku and PostgreSQL

Entrepreneurship League of São Carlos
(September 2017 - Today)

General Director | Head of Management | Head of Technology

I've helped the reestablishment of the group after 2 years of inactivity and, with my partners, I've taken it to a spotlight in the entrepreunership ecosystem of São Carlos. Some of my contributions were:

- 220% growth of the personal effective of the group.
- Co-created two high impact projects.
- Group officialdom on the university.
- Created a technology and development team.

EDUCATION

Universidade de São Paulo
8

Computer Engineering

(Febuary 2016 - July 2020)

Instituto Federal de São Paulo
8.7

Electronics Technician

(Febuary 2013 - December 2016)

HONORS & AWARDS

Finalist in BCG Gamma Challenge 2019
Finalist - Top 7

Usage of data science and machine learning tools to identify causes for late-diagnosis of cancer in Brazil and how to solve these causes.

3° Maratona de Aplicativos FIAP + Google 2015
Finalist - Top 10

Development of an app focusing on improve the education quality in Brazil.
